Relation: Manager

Role: Solutions Architect

Recommendation:

“Jaiden is one of the sharpest developers I've ever worked with. He was hired as a backend developer, but was immediately re-tasked to front end development in React. After minimal ramp-up, he was a productive, contributing member of the team, and his abilities continued to grow at an accelerated rate. About a year in, the lead front end developer departed the project suddenly and Jaiden took on the role and performed admirably.

Any company would be lucky to have Jaiden on their team. He has my highest possible recommendation.”

Relation: Senior Coworker

Role: Solutions Architect

Recommendation:

“Jaiden is the brightest developer I interviewed fresh out of college. Jaiden was able to contribute to a very complicated project and working environment soon after being hired. Jaiden's professionalism and ability to acquire and apply new skills would make him an asset to any organization.”

Relation: Senior Coworker

Role: Site Reliability Engineer

Recommendation:

“Jaiden joined my team deep in the development of a complicated system with a lot of moving parts, in a complicated organization with a lot of moving parts. Despite diving right into the deep end, he quickly established himself as a capable and competent developer, contributing to nearly every aspect of the project. Jaiden is easily one of the sharpest engineers I've had the privilege of working with, and I'm confident he'll continue to distinguish himself as his career progresses.”

Relation: Senior Coworker

Role: Senior Developer

Recommendation:

“I worked with Jaiden for around a year and it was my pleasure. He is a very talented self motivated individual. With very little direction Jaiden is able to accomplish tasks competently and quickly. He is a fast learner and able to pick up skills easily. I hope that I get to work with Jaiden again in the future.”
